• KOLA radio will be broadcasting live from the event.

Eastvale San Antonio Medical Plaza is San Antonio Regional Hospital’s newest satellite facility and brings key medical services to the area. Residents of Eastvale, Corona, Norco, South Ontario, and growing communities across the southeast region of the Inland Empire now have access to the high quality care and excellent services for which San Antonio Regional Hospital is known across the region. The plaza joins Rancho San Antonio Medical Plaza in Rancho Cucamonga and Sierra San Antonio Medical Plaza in Fontana as part of the hospital’s network of care.
The 40,000 square foot plaza includes urgent care services through San Antonio Urgent Care at Eastvale, along with a range of convenient outpatient diagnostic services such as laboratory, X-ray, ultrasound, 3D mammograms, and EKG testing. The plaza also houses several physician suites with a range of primary and specialty care physicians.

This marks completion of Phase I of a two-phase development. San Antonio Regional Hospital purchased the land from Lewis Retail Centers, the developer and manager of both Eastvale Gateway South and the adjacent Eastvale Gateway shopping center. Phase II will include development of another 30,000 square foot medical office building to house additional physician suites.
